

## Electronic Machines

**Nripesh Trivedi**

Department of Mathematical Sciences, Indian Institute of Technology, (BHU), Varanasi

Electronic machines are used to perform everyday task. In this paper, I put forward a simple concept that could be used to make electronic machines. Electronic machines could be made by **measurement** of the values **0** and **1**. These are the only values used to make an electronic machine as described in [1][2].

The conclusion is that the **measurement** of the values **0** and **1** could be used to make an electronic machine [3][4].
